

NO MORE 9-5

A more connected and engaged workforce at all levels of the business, from field offices and shop floors to hotels and headquarters.

Empower users to select the location and device that's best for the task at hand, whether it's a smartphone, Surface or laptop at work, at home or on the move. Deliver outcomes rather than simply 'put in the hours'. Collaborate, share and communicate across platforms and locations.

Computacenter can help to drive adoption of tools and devices and identify areas where they are most needed to improve the way your organisation works.

DO MORE WITH DATA

Make information work for your business rather than the other way around.

Bring previously hidden or inaccessible data to life. Organise, manage and monetise data by unlocking insight and identifying new opportunities. Harness information to make better business decisions, predict disruption and enhance efficiency.

Our experts help you to identify the data available to you and explore ways in which it can help you to achieve your goals and enhance your overall experience.

SURFACE & MICROSOFT 365: MODERN TOOLS FOR MODERN BUSINESS

Work and collaborate in more natural ways with modern software and devices to enhance productivity and unleash creativity.

Access information, create, share, collaborate and communicate on any device at any time. Benefit from familiar tools and natural interfaces, whether you type, touch or use Surface Pen. Reduce limitations and work from any location.

Our experts ensure your business derives the greatest value from technology and tools that match the organisation's processes and plans.

PEACE OF MIND IN THE CLOUD

Ongoing protection wherever your information resides and not simply within the confines of your network.

Protect data, whether it's on a mobile device in a remote location or on a laptop in the office. Experience security that doesn't obstruct the course of day-to-day business. Enable IT teams to dedicate more time to innovation and improvement.

Computacenter ensures your infrastructure continues to operate at its best without getting in the way of what's important: the success and growth of your business.
