

BRIDGING THE GAP BETWEEN EDUCATION & TECHNOLOGY

ENABLING BETTER TEACHING AND LEARNING EXPERIENCES

AFTER A YEAR OF DISRUPTION AND CHANGE, WE HAVE SEEN EDUCATORS RAPIDLY ADAPT TO DELIVER EFFECTIVE REMOTE LEARNING.

WE HAVE SEEN THAT TECHNOLOGY CAN ENHANCE STUDENT EXPERIENCE, IMPROVE LEARNING OUTCOMES AND IF USED CORRECTLY HELP TO REDUCE TEACHER WORKLOAD.

THE NUMEROUS BENEFITS OF USING TECHNOLOGY HAVE BEEN REALISED AND MANY SCHOOLS ARE LOOKING TO INCORPORATE THESE PLATFORMS INTO CLASSROOM-BASED LEARNING AND GREATER COLLABORATION.

WHETHER STARTING YOUR DIGITAL JOURNEY OR REVIEWING YOUR STRATEGY, COMPUTACENTER'S DIGITAL ASSESSMENT SERVICES PLACE STUDENTS AND TEACHERS AT THE HEART, INCREASING ENGAGEMENT AND ENHANCING LEARNING OUTCOMES THROUGH BETTER ADOPTION AND ENABLEMENT OF TECHNOLOGY.

FIVE PRIORITIES FOR EDUCATION

Computacenter help education services **adapt and evolve** so they can **empower** their students and teachers to **work productively** from any location, while **securing** their systems and data.

1 DIGITAL MATURITY ASSESSMENT

The Digital Maturity Assessment gathers key insights from the teaching and learning environments. We use these insights alongside our expertise in digital enablement to **build an effective and actionable execution plan**.

THE DIGITAL MATURITY ASSESSMENT CAN HELP BY:

- Looking at the current **ICT infrastructure**, we are able to not only guide on transformation, but identify opportunities for exploitation of existing tools and capabilities to **maximise Return on Investment**.
- Identifying potential costs** associated to each ICT initiative, providing clarity to aid budgetary and planning decisions.
- Providing strategic direction and **identify opportunities** to accelerate digital transformation so that the benefits of a Digital Education Environment can be delivered within the **shortest possible timescales**.

2 SAFEGUARDING AND SECURITY ADVISORY SERVICES

Security of data in educational settings and the management of digital identity is essential to the effectiveness and success of safe digital learning experiences.

Our **digital identity, endpoint, cloud, data and infrastructure** security advisory & consultancy services help to deliver an inherently secure educational environment that benefits from platform rationalisation, superior integration and operational efficiency benefits. We believe **security should not be "bolted on," but "built in"**. Secure digital education must be assured to maximise the benefits of digital learning.

3 NETWORK ASSESSMENT AND REMEDIATION

The **wireless network** is a critical component of a secure connected educational experience. **Inadequate wireless coverage, LAN or WAN broadband performance is no longer good enough** with both teachers and students expecting a "home like" connected experience.

Our wireless assessment and network readiness services help educational facilities evaluate the current level of wireless network effectiveness and remediate aligned to expectations of performance and reliability. The service portfolio includes whole-site coverage assessments and mapping, assurance testing and reporting, plus design and implementation services.

1	Site coverage assessments	2	Connected user assurance testing & reporting
3	Mapping	4	Design and implementation services

4 CLOUD READINESS

The key to a successful cloud migration is to ensure that you fully understand your application estate and define a clear plan to migrate.

Our **application migration assessment service** analyses your applications and creates a migration strategy highlighting which applications to migrate, the order in which to migrate them and to which target platform to maximise value.

We produce a **costed business case** which shows you the relative costs of each target cloud platform as well as a cost of migration, coupled with the benefits to be realised from the migration.

By doing this assessment you will gain a **clear strategy** for migration and maximise the speed of migration.

5 CLOUD ADOPTION & OPTIMISATION

We help educational institutions navigate cloud adoption through a range of customisable services to support you wherever you are on your cloud journey.

For those starting out on their cloud journey we can provide support in building your **cloud strategy**, aligned to vendor best practice and integrated with your existing security and operational policies.

For those who are already consuming cloud services we provide a range of **optimisation services** which help ensure you are running your environment in an optimal fashion, to avoid over-spending and to make use of the latest features from the cloud providers.

ACHIEVE MORE WITH THE RIGHT PARTNER

COMPUTACENTER HAVE PROVEN END-TO-END SERVICES TO HELP DEFINE YOUR DIGITAL STRATEGY, GET BEST VALUE FOR MONEY AND CHOOSE THE RIGHT TECHNOLOGIES FOR EDUCATIONAL NEEDS.

WE ARE TRUSTED BY OUR CUSTOMERS TO PROVIDE SECURE, RELIABLE IT SOLUTIONS THAT KEEP PEOPLE CONNECTED WHEREVER THEY ARE.

WE HAVE RELATIONSHIPS WITH **1,100+ IT VENDORS** & **4,000 MANUFACTURERS** PROVIDING CHOICE AND FLEXIBILITY TO HELP ADDRESS INDIVIDUAL AND SPECIFIC NEEDS.

UK HEADQUARTERED AND TAX PAYING
we are committed to helping develop children and young people to build a sustainable future.

WE'RE ALSO INVESTING IN THE UK'S FUTURE WITH OUR FUTURE TALENTS PROGRAMME, WHICH INCLUDES IT APPRENTICESHIPS, STEM OUTREACH IN SCHOOLS, AND A PRESTIGIOUS GRADUATE PROGRAMME.
